

## **Drama Curriculum Intent**

We believe that Drama should be an inclusive environment which develops students as **individuals with opinions** and the ability to express themselves with **creativity and confidence**. Students are given the opportunity to experience practical **role-playing and different forms and styles of Drama** in order to develop performance talents. We encourage students to **question and challenge** their perception of the world, **analysing imaginary and historical worlds** and vocalising their thoughts in an honest and confident way whilst developing tolerance and understanding for different cultures and ways of life. Not only do students develop the performance skills of **characterisation, vocal delivery and stage craft**, but they will also develop the transferable skills employers seek; **confidence, communication, concentration, empathy, co-operation and teamwork, commitment, oracy, creativity and evaluation**.
